Executive Summary

EXECUTIVE SUMMARY

LINCOLN HIGH SCHOOL MODERNIZATION

Lincoln high school (LHS) serves over 1,700 students in the Central City and Western portions of Portland, Oregon.

The current building was built in 1952. It sits on an 11-acre site in the Goose Hollow neighborhood that is bordered by SW Salmon to the north, SW 14th and I-405 to the east, several private properties including KGW to the south and by SW 18th and the MAX train tracks on the west. At approximately 180,000 SF, the physical space currently provided at LHS is more than 100,000 SF below the PPS Educational Specifications, making it the smallest high school building with the highest enrollment of all PPS high schools. The resulting severe overcrowding is a significant operational challenge and negatively impacts student engagement.

In March 2017, an exhaustive Pre-Design / Due Diligence Study firmly established that full replacement of LHS is the most cost-effective option for providing modern and efficient facilities that meet PPS Design Standards, Guidelines and Educational Specifications. Utilizing these guidelines and standards, the new LHS will provide facilities that compare equitably to the modernized high school facilities at Roosevelt, Franklin, Grant and Madison.

Other options that have been studied include the following:

Renovate Existing + Additions + Modulars: This option keeps students on site in modular temporary structures for 2 years during construction. This option costs \$40.9 Million more than the full replacement option.

Renovate Existing + Additions + Relocate to Marshall: This option utilizes Marshall as a swing site for 2 years during construction. However, it delays the Lincoln project schedule by one year because Marshall will serve as the Madison swing site until 2021. This delay and the associated escalation results in this option costing \$11.9 Million more than the full replacement option.

DISTINCT CHALLENGES

The LHS site poses some distinct design and construction challenges:

The site has unique and challenging zoning requirements. The campus is the only PPS school facility located within the boundary of the City of Portland's Central City Plan 2035. This designation requires a formal Design Review Process (Type III Land Use Review) administered by the Design Commission. The Design Commission will require the project to comply with the City Of Portland Design Guidelines (www.portlandoregon.gov/bps/34250). Those quidelines outline numerous mandatory design features that will exceed the PPS Design Standards. Some of those features are:

60% of the roof must be a planted Eco-Roof

Glazing within certain zones must be designed to be birdfriendly.

The ground floor must contain prescribed amounts of glass and must contain "active uses".

Numerous "pedestrian friendly" design features.

Emphasis on design coherence and permanence that will prohibit certain cost-effective materials and details.

Poor soils conditions will require the use of deep foundations under the buildings as well as cement treatment under the athletic fields. Despite the poor soils, the project will meet all applicable requirements for seismic safety and will be able to meet expectations for additional seismic resiliency.

Two major utility easements run through the site in the vacated SW 16th and SW 17th right-of-ways. The City Of Portland Bureau Of Environmental Services will require PPS to upgrade certain utilities within these areas.

With only 11-acres of site area and a lack of adjacent park space, LHS will not be able to provide the wider array of sports facilities found at Franklin, Roosevelt, Grant and Madison High Schools.

The site is situated in a constrained urban environment with limited access for construction and staging.

The potential cost impact of these mandatory City Of Portland requirements, as well as the cost impacts of other unique circumstances, is outlined in the Cost Summary.

PROGRAM STANDARDS - INTERIOR

LHS will be built generally in accordance with the PPS Educational Specifications. The Ed Specs are intended to serve as a programming guideline and to ensure equitable space allocations for District facilities. There is a degree of flexibility in the Ed Specs that allows for deviations and modifications that better accommodate the unique programs of individual schools. The modernizations of Roosevelt, Franklin, Grant And Madison High Schools all contain Ed Spec deviations and modifications that were approved by the PPS Board Of Education on a case by case basis.

For Lincoln High School, the design team conducted a thorough review of current curricular offerings and class schedules. In addition to this, the design team has met with a variety of stakeholders including the Steering Committee, the Design Advisory Group, LHS Administrative Staff including Principal and Vice Principals, students, teachers

EXECUTIVE SUMMARY

LINCOLN HIGH SCHOOL MODERNIZATION

and department leaders and numerous Teachers On Special Assignment (TOSAs).

The result of these reviews and meetings is a deeper understanding of the facilities required to deliver the academic program while providing flexibility for future changes. The Ed Spec modifications and deviations proposed in the program have been proposed with overall project cost management in mind. In cases where additional program square footage has been proposed, that has been offset by a program decrease in another area. In all instances, these program adjustments have been reviewed and vetted by the Steering Committee, the DAG and other impacted stakeholders. A summary of the proposed adjustments can be found on page 27 of this report.

PROGRAM STANDARDS - EXTERIOR

Due to the constrained site area, the exterior program will be limited to the following:

- One Running Track
- One turf sports field
- One 1/3 size turf practice field
- Supporting structure for tickets, concessions, restrooms, hitting facility and field storage
- One 1,500 seat grand stand
- 100 Surface parking places
- Covered bike parking as required by the City Of Portland.

Tennis, baseball, and softball will not be able to be accommodated on this site.

BUILDING STANDARDS - INTERIOR

LHS will be built in accordance with the PPS Design Standards & Guidelines. There are no deviations proposed at this time. Some interior elements of the existing building may be salvaged for reuse in the new building to reflect the history and culture of LHS. These elements may include the Lincoln statues, the wooden bleacher fronts, the old gym floor and other items of memorabilia.

BUILDING STANDARDS - EXTERIOR

LHS will be built in accordance with the PPS Design Standards & Guidelines. The exterior design will address the project's architectural and programmatic requirements. The visual expression of the building will be respectful of its context while providing a civic identity. The main exterior wall materials of the building will meet the design goals set forth in the City Of Portland Design Guidelines. In general, these guidelines require a more enhanced level of finish and detail than described in the PPS Design Standards. The

Project will seek the most economical path towards meeting both the City's and PPS's objectives.

The desire for transparency will be balanced with the thermal performance of the enclosure to ensure that the Project meets its energy reduction goals. The building envelope will respond to the local climate to optimize energy performance.

SUSTAINABILITY

Per PPS guidelines, this Project will be designed to meet a minimum of LEED for New Construction In Schools (V4) Gold Certification.

SCHEDULE

The project will begin construction in late Spring of 2020. Students will remain in the existing facility while the new one is constructed. Upon completion of the new facility in Fall 2022, the existing building will be demolished and the new track and field will begin construction. The track and field will be completed no later than Fall 2023.

PATHWAYS TO BUDGET

Upon receipt of the first draft of the project cost estimate in March 2018, it became clear that the costs for Madison, Lincoln And Benson High Schools were all over the budgets established in the Bond. On March 15, 2018 the Lincoln High School team developed three pathways to budget. These options were as follows:

Option A: Build the program per the Ed Spec and achieve equity and parity with other High School projects.

Option B: Reduce program by 10% to 254,000 GSF. This includes the deletion of 5 classrooms, one art room, the Teen Parent Center, the Health Center and other size reductions to many other parts of the program. The result would be a facility that would not accommodate 1700 students as desired. Parity and equity would be compromised.

Option C: Reduce program by 17% to 234,000 GSF. In addition to the reductions in Option B, the grandstands, auxiliary gym, library classroom and other CTE spaces would be deleted. The result would be a facility that would not accommodate 1700 students as desired. Parity and equity would be highly compromised.

The PPS Board Of Education stated in numerous meetings focused on Madison High School that they desired equity and parity between all High School programs, and that programs should meet the Ed Specs and not be eliminated or reduced. The pathway to budget options were reviewed with the LHS Steering Committee and with OSM. The recommendation and direction from both groups was that Option A should be pursued and that no programs should be cut.

EXECUTIVE SUMMARY

LINCOLN HIGH SCHOOL MODERNIZATION

COST

COST

Hard Costs:	\$182,046,856
1.5% Green Energy Technology Requirement:	\$2,730,703
Subtotal Hard Costs:	\$184,777,559
Potential Off Site and ROW Improvements:	\$2,000,000
TOTAL HARD COSTS:	\$186,777,559
Soft Costs @+/- 13%:	\$25,615,000
FFE:	\$6,000,000
Swing / Temp Facilities and/or Fields:	\$2,000,000
Project Contingency @ 10%:	\$22,000,000
Escalation:	Included in hard costs above
TOTAL SOFT COSTS:	\$55,615,000

TOTAL PROJECT COSTS: \$242,392,559

The following items are costs incurred by the project due to geotechnical conditions and City of Portland jurisdictional requirements. These costs are included in the hard cost estimate above:

- Deep Foundations required due to undocumented fill: \$5.9 Million
- Cement Treatment under Track and Field due to soft soils: \$1.5 Million
- City of Portland Central City Design Guidelines: \$4.4 Million (Green Roof Requirements, Bird Friendly Design, Exterior Materials and Detailing Quality, Covered Bicycle Parking, Utility Upgrades and Relocations, Sidewalk Improvements)

ADDITIONS / ALTERNATES

The following items are potential additions to the project that are not included in the total project costs described above:

Elevator stop to the roof: \$131K

Ground Source Heat Pump @ Tanner Creek: \$313K

Fly Tower with Gridiron at Stage: \$1.5 Million

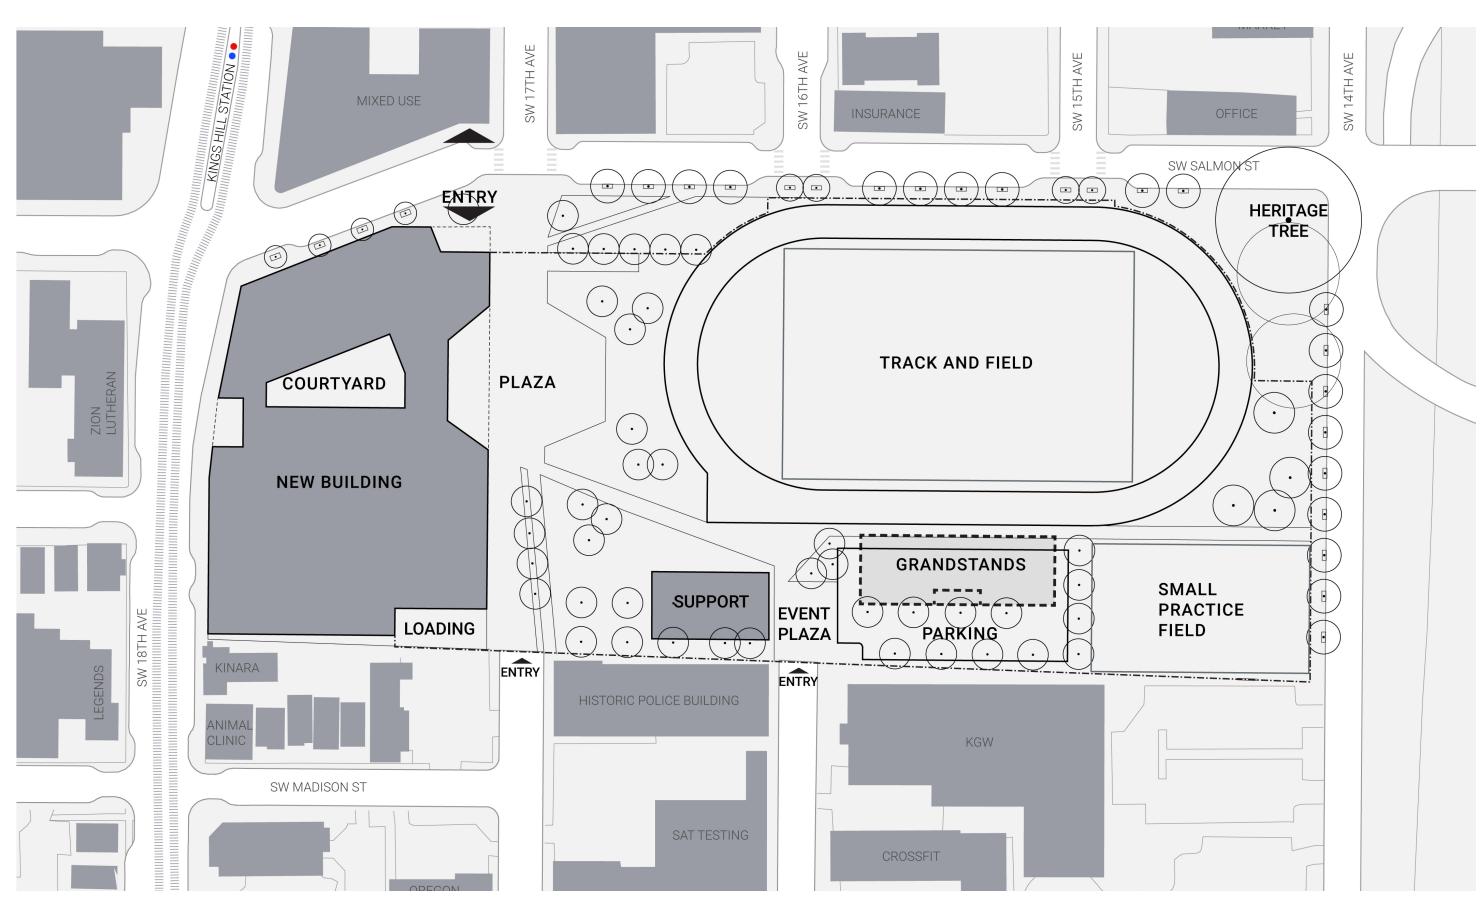

Additional Programs: \$3-4 Million (CTE Shop, Up-size ½ size wrestling to full size wrestling)

SUMMARY OF INCREASES AND DECREASES TO ED SPEC LINCOLN HIGH SCHOOL MODERNIZATION

Proposed LHS Master Plan Program	289,261 SF
Proposed LHS Ed Spec Decreases To offset Increases above	(22,890 SF)
Proposed LHS Ed Spec Increases	+ 21,098 SF
Ed Spec Range	281,098 SF - 329,338 SF

REQUIRED/DESIRED TO MEET CURRENT ACADEMIC NEEDS

Career Preparation / CTE

+1,090 SF Miscellaneous Size Increases - To accommodate existing successful CTE programs including Product Design, Culinary Arts, and Business. Classrooms +1 General Education Classroom +930 SF - Increases total of general education classrooms from 41 to 42. Ideally Lincoln would have 46 classrooms to support scheduling needs based on current capacity and curriculum offerings +1 Science Lab Classroom +1.375 SF - Increases total of science classrooms from 11 to 12. Ideally Lincoln would have 13 science labs to support scheduling needs based on current capacity and curriculum offerings which include a high number of advanced classes +2 Science Prep Rooms / Larger Prep Rooms +1,300 SF - Increases total of science prep rooms from 4 to 6 and increase size. Larger prep rooms are required to support current curriculum offerings which include a high number of advanced classes; added rooms support efficient sharing of prep rooms by pairs of Lab Classrooms +5 Enclosed Project Rooms +1,100 SF - Reallocated from "Open Flex Area" space allowance in Ed Spec Extended Learning Areas category to Optional Ed Spec usage within same category. Enclosed project rooms support focused team project work without distraction +8 Small Student Collaboration Rooms +640 SF

- Accommodates student collaboration, testing (including required IB protocols), and

individual study

REQUIRED/DESIRED TO MEET CURRENT ACADEMIC NEEDS

Fine & Visual Arts

+1 Photography Lab / Dark Room - Required to support existing curriculum	+350 SF
+1 Kiln Room - Required to support existing curriculum and maintain safe working environment	+100 SF
+1 Supply / Storage Closet - To provide adequate storage capacity for materials, equipment and student projects to support existing curriculum needs	+160 SF
Band / Orchestra	
+4 Additional Practice Rooms - Education Specification is not sufficient to support existing demonstrated need	+360 SF
Choir	
CHOIL	
+1 Choir Room , +1 Choir Office & +1 Equipment & Robe Storage - Required to support existing curriculum and choir program	+1,820 SF
+1 Choir Room , +1 Choir Office & +1 Equipment & Robe Storage	+1,820 SF
+1 Choir Room, +1 Choir Office & +1 Equipment & Robe Storage - Required to support existing curriculum and choir program	+1,820 SF +825 SF
+1 Choir Room, +1 Choir Office & +1 Equipment & Robe Storage - Required to support existing curriculum and choir program Theater Arts Theater size increase to match Franklin & Roosevelt High Schools - Required to accommodate 500 seats (Ed Spec quantity - standards are too low)	

REQUIRED/DESIRED TO MEET CURRENT ACADEMIC NEEDS

Physical Education

+1 Dedicated Wrestling Room

+1,600 SF

- To accommodate current needs that are housed in off-site facilities and reduce associated travel time; to increase student access to classes in a separate, dedicated Movement/Yoga Room, and to reduce conflicts between mirrors required for movement classes and pads/mats required for wrestling - a significant safety issue.

Counseling / Career

+1 IB Coordinator Office

+120 SF

- Accommodates current curriculum requirement

Technology Access

+1 Audio Recording Room

+300 SF

- Provides acoustically isolated recording room for students to create content to support digital media classes. Video capture to be achieved in classroom.

+5 Equipment Storage

+200 SF

- Secure storage for specialized photography and digital videography equipment

Special Education (SPED)

Space Adjustments

+260 SF

- Adjusted based on feedback from PPS SPED specialists. Various room sizes modified. Learning Resource Center office and meeting space added.

Emerging Language Learning (ELL)

Room Size Increase

+130 SF

- Align with typical classroom size to allow future flexibility / use as general education classroom if needed

TOTAL GROSS AREA INCREASE

REQUIRED/DESIRED TO MEET CURRENT ACADEMIC NEEDS

Student Center

+200 SF +1 Student Store - To meet current need and support Business CTE program Media Center +1,020 SF Increase size of Library Classroom - Room increased to double - classroom size to support existing programs (including all-staff meetings, study hall, debate, Model UN, and Constitution team) and provide future flexibility for instructional requirements. Partially offsets reduced overall size of Media Center. +120 SF +1 Small Conference Room / Flexible Use Room - Exchanged in lieu of dedicated Library Office Miscellaneous +660 SF +11 Gender Neutral Toilets - Education Specification includes one single stall gender neutral restroom. Universal Design guidelines and building codes require additional provision. Current proposal places at least one room on each floor of the building. +240 SF + 3 Elevator Machine Rooms - Multi-story building will require additional elevators beyond the single one required by the Education Specification. Total Proposed Net Area Increase +15,070 SF Net/Gross Adjustment (40% multiplier) +6,028 SF

+21,098 SF

IDENTIFIED TO OFFSET AREA INCREASE AND CONTROL COSTS

Classrooms

General Education Classrooms

(-2,050 SF)

- Standard classroom size decreased from Education Specification size of 980 SF to smaller 930 SF standard

Science Lab Classrooms

(-1,650 SF)

- Standard Lab Classroom size decreased from Education Specification size of 1,500 SF to smaller 1,350 SF standard

-2 Open Flex Areas

(-1,100 SF)

- Decreases total space count and increases size of each remaining flex area, to offset provision of optional Enclosed Project Rooms

Theater Arts

Stage Size Adjustment

(-300 SF)

- Decreases stage sized based on technical feedback from Theater consultant. Education Specification stage is oversized.

Administration

-5 Teacher Offices

(-5,150 SF)

- Reduces total number of teacher offices from 10 to 5; offices to be located one per floor in vertical academic bar. Contemporary work standards such as "hot desks" and smaller space allocations per user allow overall reduction in area.

Technology Access

-1 Computer Lab

(-600 SF)

- Reduces total number of computer labs by one. Technology is more distributed throughout general classrooms; 5 computer labs are not required to support Lincoln's curriculum needs

IDENTIFIED TO OFFSET AREA INCREASE AND CONTROL COSTS

Media Center

Reduce overall size of Media Center

(-3,500 SF)

- Takes Education Specification option for smaller Media Center - larger option is better suited to renovation projects. Meets current curriculum needs.

Smaller Instructional Spaces

-5 Small Instruction Spaces

(-2,000 SF)

- Eliminates 5 of 10 total small instruction spaces; provides one per floor. Meets current curriculum needs.

Total Proposed Net Area Decrease

(-16,350 SF)

Net/Gross Adjustment (40% multiplier)

(-6,640 SF)

TOTAL GROSS AREA DECREASE

(-22,890 SF)

COMPONENT	COMMENTS	TOTAL
Hard Cost	New Building and Site work Estimate provided by professional cost estimator Estimate based on current Master Plan Design	\$182,046,856
1.5% Green Energy Tech	Required by State of Oregon	\$2,730,703
Subtotal		\$184,777,559
Off Site and Public Works Improvements	Potential Required Improvements (Not included above)	\$2,000,000
TOTAL HARD COSTS		\$186,777,559
Soft Cost	~ 13% of Hard Costs	\$25,615,000
Fixtures, Furniture & Equipment	~\$21/SF	\$6,000,000
Swing Space / Temp Facilities	Based on Current PPS Project Data Temporary Facilities, transportation, etc.	\$2,000,000
Contingency	10% of Total Costs	\$22,039,256
Escalation	Included in Hard Cost Estimate	
TOTAL*		\$242,431,815
*Excludes the following add alternates:		
Add Elevator Stop to the Roof		\$131,000
Add Ground Source Heat Exchange System /	Tanner Creek	\$313,000
Add Fly Tower and Orchestra Pit		\$1,500,000
Additional Program Areas		\$3-4 Million

COST MANAGEMENT STRATEGIES IMPLEMENTED TO DATE LINCOLN HIGH SCHOOL MODERNIZATION

Reduction of building height from 9 to 7 stories

Did not implement numerous stakeholder requests, including:

- Tennis Courts (on roof and/or on site)
- Larger and/or covered bleachers
- City request for underground parking

(Resulted in modification to City of Portland design standards.)

- City request for Superblock requirements

(Resulted in modification to City of Portland design standards.)

Implemented shared and multi-use spaces, including:

- Arts
- Library Classroom / Model UN room
- Hitting / Wrestling

Implemented innovative Theater Design:

- Tension Grid in lieu of Fly Tower

(Proposed deviation from Ed Spec. Further discussion required.)

Raised level of Track & Field

(Reduced earthwork & retaining walls.)

SCOPE REDUCTION OPTIONS

LINCOLN HIGH SCHOOL MODERNIZATION

SCOPE REDUCTION OPTIONS

	Scope	SF	Project Cost	Impacts
Α	Current Master Plan	289,261	\$242.4 M	
		SF Reductions	Cost Savings	
В	Delete Spaces / Programs Above Minimum		(\$2.8 M -	
,	Recommended Ed Specs Choir and One Practice Room	(6,192)	\$3.1M)	Eliminates curriculum & reduces capacity
	Dedicated Wrestling Room			If off-site, increases student travel. If on-site, possible safety issue (mirrors)
	IB Conference Rooms			Required testing moves off-site
	Model UN (requires adding back Library Classroom)			Doesn't support existing successful program
С	Delete Spaces that do not Impact Academic Curriculum or Capacity	(6,996)	(\$8.8 - \$9.1)	
	Teen Parent Center			
	Health Center (Nurse and Sick Room Remains)			
	Clothes Closet / Food Pantry			
	Partner Health Classroom			Eliminates potential partner opportunity
	Indoor Running Track (Maintain Code Required Exit)			
	Hitting Facility			Increases student travel
	Grandstands			Does not support league competition
	Small Practice Field			Increases student travel
	Ticket and Concessions Reduce PPS Technical & Construction Standards	N/A	(3-5M)	Reduces ability to collect revenue
D	Reduce FF3 Technical & Construction Standards	IN/A	(3-3141)	
	Delete LEED Requirement			Results in higher operating costs
	Negotiate GET exemption			Results in higher energy costs
	Reduce Technical Standards			Results in higher maintenance costs
	Change Turf to Grass			Results in higher maintenance costs

Note: In the event that scope reduction options are selected, design team will evaluate possible schedule impacts.

Grant High School Modernization

SOFTBALL FIELD OPTIONS

Updated: August 1, 2018

This document is intended to capture the options to provide softball facilities at Grant High School and provide information on the benefits and impact of each option.

Background Summary

The project had included a dedicated field for softball in an area referred to as the "Hollyrood Field" in the early phases of master planning. However, due to a combination of operational and budget concerns, it was removed from the project budget in the Fall of 2017. After that time, we have continued work through all the challenges that are faced including site area constraints, operations and community safety concerns, and funding allocations to find a solution to provide a new softball facility.

A few key points about the decision on the softball field were:

- In the Fall of 2017, PPS was in final negotiations with the general contractor on the construction contract. Decisions had to be made at the time on scope items to include in the contract that were feasible to be completed by the opening of school in August 2019.
- During these negotiations with the general contractor additional information surfaced identifying complex risks that we were not able to resolve by the required deadline in order to execute the construction contract.
- These key issues related to Portland Parks & Recreation property involve community safety, operations, and the overlay zone of the Dog Off Leash Area (DOLA) in the extremely dense and compact North Field.
- The softball field was identified as a program element that could be added back later with minimal impact to Grant students and staff. Coming back to complete field work is much easier than attempting to add or modify program space within the existing building where it is either occupied, or there are very limited construction periods available during the summer.

Current Status

PPS is currently considering 4 options to provide upgraded facilities for softball. Three of the options include locations adjacent to Grant High School, and one_option includes improvements to Wilshire Park. Efforts are being made to identify the best option that works for the whole of the Grant High School community and PPS. Once the best option has been identified, funding sources will be sought to carry the project forward. The following are the options identified:

Option 1 – North Field

Option 2 – Grant Bowl

Option 3 - South Field

Option 4 – Wilshire Park

It is important to note that all options are located on property owned by PP&R, and they will be a key partner in the planning and administration of the final option that is chosen. PP&R has many other public interests to maintain, which include, but are in no way limited to Grant High School.

While all options have significant challenges, and potentially negative impacts, we are pursuing research into follow up information needed on all 4 options. Based on the feedback there were 2 options that were more favorable.

- Option 3. Implementation of this option will not require any additional funding and can be achieved within the current schedule for opening in August 2019. This will provide PPS, and GHS administration flexibility to use a shared field scenario at any time or keep it in a configuration for baseball.
- Option 1. Continue to look at solutions to mitigate the challenges of a softball facility in the North Field.

OPTION 1 - North Field

Develop the Hollyrood field for construction of (1) softball field. This location was shown in the Master Planning process and would use this as the basis of design.

Scope Elements

- New natural turf field. Include subgrade, drain tile, irrigation system
- New field elements, backstop, bleachers, etc.
- ADA water fountain
- 30' Protective fencing for parking lot
- Temporary outfield fencing
- ADA upgrades to the footpaths in Hollyrood field area

Wilshire Park Use

:: Fall

No PPS use

:: Spring

No PPS use

(PP&R will turn into youth soccer field)

North Field Use

:: Fall

No PPS use; U10 Soccer (PP&R)

:: Spring

Softball (W) Varsity, JV

Grant Bowl Use

:: Fall

Football (M) Varsity, JV; Soccer (M) Varsity, JV, JV2; Soccer (W) Varsity, JV, JV2

:: Spring

Track & Field (M, W) Varsity, JV; Lacrosse (M) Varsity, JV; Lacrosse (W) Varsity;

Little League "Farm Teams" (PP&R)

South Field Use

:: Fall

Soccer (M) Varsity, JV, JV2;

Soccer (W) Varsity, JV, JV2

:: Spring

Baseball (M) Varsity, JV, JV2

Pros / Cons

Pros

- Location here is the same as shown in Master Plan.
- Location has Land Use Approval
- Dedicated softball field available on GHS campus
- Permanent softball field, backstop, and seating
- Retains (1) U-10 soccer field for community use

Cons

- JV and Varsity will not have fields to play at the same time.
- Due to use requirements by PP&R, Wilshire Park will no longer be open for use by GHS Softball. Only one dedicated softball field will be available. Use of shared field at Grant Bowl will remain necessary to play multiple games/practices at same time
- Outfield area overlaps with DOLA. Will be extremely challenging to move
- Adult leagues can hit long enough to reach the community use
- Daily maintenance (installation and removal) of temporary outfield fences
- PPS Custodial services needed to service additional area for the field
- 30' high protection netting and poles that would affect site lines/aesthetics
- Natural turf subject to rain outs
- Due to constraints of the location outfield will be built to minimum dimensions

Open Items to Research:

- Is there a Title IX issue for providing natural turf for the softball field and artificial turf for the baseball field?
- What other parks have similar safety issues with the short outfield dimensions?
- Verify with PP&R the inability to use Wilshire Park if the North Field is built. Is there another solution to scheduling the activities displaced by softball?

OPTION 1 - North Field

Feedback from Portland Parks & Recreation:

Option 1: PP&R not in favor of this option reasons in memo.

Pros: *correction* North field would continue to be a shared use field in spring - not dedicated to softball only

Cons: Distance from field of play to obstructions below NFHS recommended minimums.

PPS will lose use of two natural turf field at Wilshire for one below standard field at Grant.

Extent and height of netting still to be determined.

Open items:

Wilshire is better set up for softball and north field is better suited to youth field sports.

Would probably look to PPS to take on risk/liability for adding a ballfield in this area

Note: maintenance responsibilities still to be determined – as this would be an additional field that needs to be set up for high school games.

RANKING (1 thru 4)

GHS (BB&SB).....1

PP&R4

Initial Build Cost Impact.....2

Construction Schedule Impact....2

Feedback from GHS Baseball & Softball (BB&SB):

The softball program can run an excellent program with use of one field on campus plus the auxiliary gym and the maingym as practice spaces. Softball and baseball have successfully navigated sharing gym space on rainy days.

Donot permitto adult leagues, instead permitto youth softball. Use netting during the season to extend the height of the fence.

Minimum fence distance is 200 feet for 18U softball, however...NSA Rules Section 3 Ground Rules and Special Rules-Ground rules or special rules establishing the limits of the playing field may be agreed upon by leagues or opposing teams whenever backstops, fences, stands, vehicles, spectators, or other obstructions are within the prescribed area. Does the PIL already use fields that are 185 due to space limitations? Other OSAA fields?

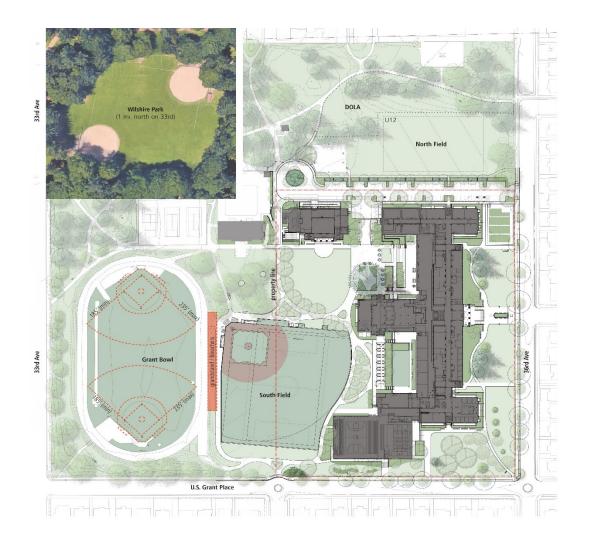

Grant Modernization Project -- North Softball Field

Obsta	cles		Lead Agency	Questions
1	Budget	Eliminated from scope to stay within project budget as part of value engineering process?	PPS Bond Project	What \$ amount was saved? What is the budget for the softball field and what is included in that? Has the money saved from removing softball already been allocated to other project elements? Is there any project contingency remaining? How much is the funding gap for the north field? What other funding sources have been investigated outside of GMP? What softball field-related work is advancing? Are any improvements or commitments happening now that would preclude the north field from proceeding?
2	DOLA .	"Extremely challenging to move"	PP&R	Are there options to adjust rather than move? What is the background on this DOLA and what makes it extremely challenging?
3	Safety / Liability	Concerns for adult league balls to be hit into community use area from non-permitted pick-up games.	PP&R	How could Grant Bowl be acceptable to PP&R but not the north field? PPS staff investigating similar "short" outfields in other parks Would an extended left field fence address this concern?
4	Schedule	Will delay project/can't fit into current schedule	PPS Bond Project	What decisions need to be made by when in order to include in Gran Mod Project/open in first spring after school opens? How long would it take to design, permit and construct the field? What is contracting process to add the north field back into the contractor's scope of work at this time?
5	Dirt infield	Dirt infield is preferred softball surface - potential Title s Issue if baseball has turf and softball has dirt.	PPS Bond Project	PPS staff is researching
		Infield becomes problemmatic as shared use	PP&R	is it possible to fit a youth soccer field in outfield after fences are removed at end of season?
6	Tree limb impacts	Impacts to existing trees	PP&R	Is this issue eliminated by moving field to east per the plan?
7	Parking lot	Potential property damage from foul balls	PPS	Was fence not assumed in the plan?
8	Land use permit	Location and use is approved; unclear whether new scope elements would require review/new process	PPS Bond Project	Would modifications to land use permit be needed? What is process to do that?
9	Field programming	Current programming of north field would need to accommodate youth soccer	PP&R	Is this a fencing/infield issue or a programming issue? Are younger teams/smaller fields also an option?
10	PPS Custodial Impacts	Added work for PPS staff to service additional area for the field	PPS/PP&R?	What are the additional PPS functions? Team currently sets up fence and cleans field after games. Would PP&R allow outfield fence to remain up during season and remove when done each year (e.g. baseball)?
11	Wilshire Park	PP&R will not allow PPS access to Wilshire Park	PP&R	What currently-permitted activities are displaced by Grant softball or north field?
12	Compromised operation	Outfield fence at 185'; can't have simultaneous co- located Varsity/JV games		These compromises can be accommodated by softball program
13	Fence aesthetics	30' high protection netting and poles would affect site lines/aesthetics	PP&R?	

7/15/2018

OPTION 2- Grant Bowl

Develop Grant Bowl to allow for (2) softball fields to share use of the field with track and football. This will include the installation of lights to allow for evening play.

Scope Elements

- New bleachers on both sides of the bowl
- New Concession Stand and Restrooms
- New field lighting

Wilshire Park Use

:: Fall

No PPS use

:: Spring Softball (W) JV

North Field Use

:: Fall

U12 Soccer (PP&R), Multi-Use (PP&R)

:: Spring

U12 Soccer (PP&R), Multi-Use (PP&R)

Grant Bowl Use

<u>:: Fall</u>

Football (M) Varsity, JV;

Soccer (M) Varsity, JV, JV2; Soccer (W) Varsity, JV, JV2

:: Spring

Track & Field (M, W) Varsity, JV; Lacrosse (M) Varsity, JV; Lacrosse (W) Varsity;

Little League "Farm Teams" (PP&R);

Softball (W) Varsity

South Field Use

:: Fall

Soccer (M) Varsity, JV, JV2; Soccer (W) Varsity, JV, JV2

:: Spring

Baseball (M) Varsity, JV, JV2

Pros / Cons

Pros

- Multiple sports and leagues benefit from installation of the lighting and grandstands including track, football, and softball.
- JV and Varsity Softball both remain on GHS campus.
- Donor funding available for significant portion of the construction.
- Option to use Wilshire Park remains in place
- Minimizes rain outs

Cons

- Compromised field dimensions. Not full size, no run off areas and minimal backstop area
- No permanent structures for softball field elements except for seating
- Softball field is played on artificial turf
- Daily maintenance of temporary fences and backstop
- Shared field with other sports such as track and field
- High risk that project doesn't move forward due to land use issues, funding, and community input.

Open Items to Research:

- Confirm that this option cannot support appropriate dimensions for a softball field?
- Can the Grant Bowl continue to be used an option for softball practice if another location is built?

OPTION 2 - Grant Bowl

Feedback from Portland Parks & Recreation:

Second preference.

Improvement of the bowl will benefit school sports, youth sports and community use. PP&R would support but not lead this effort.

Cons: correction: Grant bowl is currently set up for two softball fields. Backstops and dugouts are in place. Current field layout on Bowl is a min. of 180'. Has issues but has been used for games and practices since installed. Look at options to reduce issues.

Feedback from GHS Baseball & Softball (BB&SB):
This is ranked #3 out of 4 of all the options.

OPTION 3 - South Field

Re-design the shared field for softball, baseball and soccer. This option includes sharing the same infield location for softball and baseball. A removable pitching mound will be used so that the field could either be shared in-season, or baseball and softball would alternate seasons on campus.

Scope Elements

- Shared field with baseball including bleachers, dugouts, backstop
- Removable pitching mound for baseball
- New outfield fencing specific to softball

Wilshire Park Use

:: Fall

No PPS use

:: Spring

Softball (W) JV

North Field Use

:: Fall

U12 Soccer (PP&R), Multi-Use (PP&R)

:: Spring

U12 Soccer (PP&R), Multi-Use (PP&R)

Grant Bowl Use

:: Fall

Football (M) Varsity, JV;

Soccer (M) Varsity, JV, JV2; Soccer (W) Varsity, JV, JV2

:: Spring

Track & Field (M, W) Varsity, JV; Lacrosse (M) Varsity, JV; Lacrosse (W) Varsity;

Little League "Farm Teams" (PP&R)

South Field Use

:: Fall

Soccer (M) Varsity, JV, JV2;

Soccer (W) Varsity, JV, JV2

:: Spring

*Shared field or alternating seasons
Baseball (M) Varsity, JV, JV2; Softball (W) Varsity, JV

Pros / Cons

Pros

- Softball field available on the GHS campus
- Options for softball to use Wilshire Park and the Grant Bowl remain
- Equalized time and facilities between baseball and softball on GHS campus
- Can be completed within timeline of the current project
- No additional funding required outside of the currently GHS project budget
- Minimizes rain outs
- Outfield fencing would stay up through the season. Daily maintenance would not be required (if alternate seasons are implemented)

Cons

- Difficult logistics to alternate seasons. Location for baseball would be at Fern Hill Park
- Softball will play on artificial turf
- Pitcher's mound is heavy and difficult to move, and a risk to its durability.
- Cost and maintenance impact of moving pitcher mound

Open Items to Research:

- What are the operational cost impacts of alternating seasons between softball and baseball?
- Fern Hill Park has been identified as an alternate location for baseball. If baseball plays at Fern Hill Park, what improvements are needed for it to be an adequate facility?

OPTION 3 - South Field

Feedback from Portland Parks & Recreation:

Preferred option: Would be available when school reopens. Field improvements at other sites could provide good options for both softball and baseball.

Pros: Boy and Girls sharing upgraded field (in keeping with title IX) Roosevelt high school are share a field. Understand Frandklin HS will have a have a shared field for baseball and softball (diagonally).

Maximizes synthetic turf investment.

Pitcher mound is movable. This option is used on other fields in Portland; Concordia – others?

Recommendations from PP&R (previously sent to PPS project team).

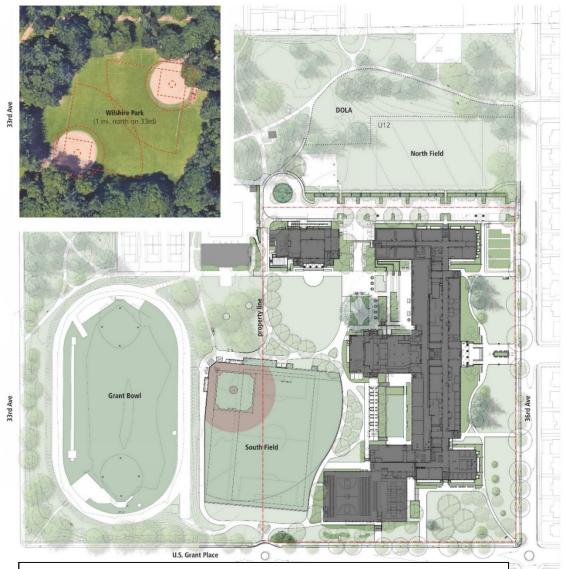

- Recommending base pegs at 60', 70', 80' and 90'.
- Request no dirt at mound area.
- Should have discussion about areas that may need frequent replacement of turf so they can be maintained adequately (turf replacement and settlement).

RANKING (1 thru 4)

Feedback from GHS Baseball & Softball (BB&SB):
This is ranked #4 out of the 4 options.
It was voiced strongly that sharing the field is not a viable option.
Was also voiced strongly that rotation of use between Softball and Baseball would have significant negative impact to the critical Grant Youth Baseball program.

OPTION 4 – Wilshire Park

Design would include enhancements to the (2) existing softball fields at Wilshire Park.

Scope Elements

- Upgrade existing natural turf
- New bleachers at both fields
- New Concession Stand and Restrooms
- New field lighting

Wilshire Park Use

:: Fall

No PPS use

:: Spring

Softball (W) Varsity, JV

North Field Use

<u>:: Fall</u>

U12 Soccer (PP&R), Multi-Use (PP&R)

:: Spring

U12 Soccer (PP&R), Multi-Use (PP&R)

Grant Bowl Use

:: Fall

Football (M) Varsity, JV

Soccer (M) Varsity, JV, JV2

Soccer (W) Varsity, JV, JV2

:: Spring

Track & Field (M, W) Varsity, JV; Lacrosse (M) Varsity, JV

Lacrosse (W) Varsity;

Little League "Farm Teams" (PP&R)

South Field Use

:: Fall

Soccer (M) Varsity, JV, JV2;

Soccer (W) Varsity, JV, JV2

:: Spring

Baseball (M) Varsity, JV, JV2

Pros / Cons

Pros

- Updated permanent field, seating
- JV and Varsity in same location
- Natural turf

Cons

- Softball facilities are not on the GHS campus
- Long schedule for planning and design.
- Risk that project will not be completed due to support by Parks, community, etc.
- Potential Land use approval will have to be completed
- Risk of rain outs

Open Items to Research:

- What field improvement will be required to make this and adequate location?
- Will field lighting be required or preferred? Will the community support field lighting?
- Field dimensions appear to have overlapping outfields. Will fencing be required? Temporary or permanent?
- Are there corporate partnerships available to support the improvements?

OPTION 4 - Wilshire Park

Feedback from Portland Parks & Recreation: 3rd preference – in conjunction with Option 3. Open items: Parks is open to discussion concerning improvements at Wilshire – possible other partners could contribute. Lighting would be preferred to extend schedule of use. Other Field option: Look at feasibility of using Erv Lind Field for more softball Pros: Centrally located for Franklin, Grant, Madison, Cleveland and Benson campuses. Currently available to PPS Monday – Friday 3-6 pm with Franklin currently utilizing this location.

RANKING (1 thru 4)

Feedback from GHS Baseball & Softball (BB&SB):
This is ranked #2 out of the 4 options.

MEMORANDUM

To: Jaime Hurd, Portland Public Schools

From: Brett Horner, City of Portland Parks & Recreation Planning Manager

RE: July 2018 Grant High School Field Options

As requested, this memo summarizes Portland Parks & Recreation's (PP&R) perspective on the proposed options for field design and use in Grant Park and at Grant High School. We understand that PPS has already narrowed the choices to two options based on the input to date.

Portland Parks & Recreation recommends PPS proceed with Option 3. This recommendation is based on the following findings:

- 1. Fields that accommodate soccer, lacrosse, and rugby sports are in higher demand citywide than are baseball/softball fields. The conversion of the Hollyrood field in Grant Park, which primarily now serves non-school soccer and lacrosse use, to softball, is not favorable from PP&R's needs standpoint. We do understand the high school has a desire and need for adequate facilities, including an adequate softball field, directly adjacent to or on the school property, however, Grant High School's property footprint simply does not allow for this.
- 2. The softball field previously designed with the remodernization project in Grant Park (Hollyrood field), is inadequate due to space constraints, compounded by the northerly movement of the parking lot at the south edge of the Park, and north of the high school. The field's deficiencies were not immediately apparent in the land use plans, and were only discovered later as detailed construction documents were reviewed. The main concern with a softball field in Grant Park is that there is simply not adequate outfield and behind home plate space for the field, especially since we know community use will occur when the high school is not using the field, with use by adults who can likely hit softballs farther than the field would accommodate, creating safety concerns along the park path to the north of the proposed field. We note that bat construction over the past two decades, with advanced composite materials, has increased batted ball velocity (BBV) and hit distance.

Administration

www.PortlandParks.org Amanda Fritz, Commissioner Kia Selley, Interim Director

3. The inadequate field distances are noted as follows:

Metric	National Federation of State High Schools Association (NFHS) Recommendations	Proposed Softball Field in Grant Park (Hollyrood Field)			
Distance from home plate to	25 feet	15 feet			
backstop	(note this is for <i>safety</i>				
	purposes)				
Distance from foul lines to any	25 feet	8-10 feet (trees in left field)			
obstructions (fences, trees,		16 feet (to dugout fence)			
slopes, etc.)					
Outfield distance from home	185-235 feet	Varies; in left field, less than			
plate to home run fence – high		180 feet to trees, less than 175			
school fast pitch		if backstop is properly sited			
		from home plate			
		Less than 200 feet to toe of			
		slope			
Outfield distance from home	275-300 feet	Same as above			
plate to home run fence – high					
school slow pitch (male)					

- 4. Foul balls will likely impact the adjacent parking area and damage vehicles or create safety hazards for pedestrians in the parking lot. It is our understanding that PPS is not proposing high enough fencing along the right field foul line to address this issue.
- 5. Finally, there is a slope up in what would be the outfield area that is also undesirable from an outfield player's standpoint.

OPTION 3

6. PP&R fully supports meeting Title IX and this was the primary reason we supported the earlier softball field as part of the land use approval for the school remodernization project, with the understanding that Grant HS softball would use the new field in Grant Park, and cease use of the two Wilshire Park softball fields, in order that displaced field use (soccer and lacrosse) from Grant Park could be relocated up at Wilshire Park. We support option 3 because that option appears to meet Title IX requirements on a field directly adjacent to the high school that can better meet minimum softball field design standards. It also has fewer impacts to Grant Park, and gives both the boys baseball program and girls softball program the same high quality field experience, with synthetic turf, proper fencing, and potentially, future night lighting.

PP&R appreciates the opportunity to work closely with PPS on this important modernization project that provides multiple benefits to park users, students, the immediate neighborhood and the larger Portland community.
